Healing for Healers; Professional Healer's Workshops

Dolls For The Soul™ Therapeutic Arts Method I
An alternative healing modality workshop

This first of two Workshop Intensives is a soul doll-making, healing arts workshop using shamanic techniques, developed through the intuitive gifts of healing artist, Nina Ayin Reimer. The workshop enables participants to develop and enhance their intuitive ability, in order to better understand the physical, emotional and/or spiritual blocks contributing to illness and begin a healing process. While the skills taught are the similar to other workshop offerings using the Nina Ayin's unique creative and meditative practices, this workshop is specifically designed for Healing Professionals for their own self-exploration and as a complimentary modality in their work with clients. Alternative practitioners, expressive arts therapists, nurses, doctors, psychologists, social workers and other healers have benefited from the work; it is also open to professionals working in hospice care, or with 'at risk'/gifted/ADHD and autistic youth.

The artist is a medical illustrator, certified health educator, Reiki Master, therapeutic arts counselor and medium, with over twenty-five years of experience working with youth and adults in healing and educational environments. Completion Certificate, all materials manual and book provided. A list of professional endorsements is available from the artist. **NO ART EXPERIENCE REQUIRED**
